# SKIN CONTACT ORANGE + AMBER

## FUNKY. NOT FAULTY.

Skin-contact wines are often misunderstood. Sure, we've seen some bad examples in recent years, but if you look with curiosity and childlike wonder, you'll discover the historic taste of traditional winemaking. The roots of 'amber' wine date back thousands of years to Georgia, the original birthplace of wine, where both red and white grapes were fermented in qvevri's (large clay amphorae buried in the Earth). It's the oldest method of making wine and speaks of history. Skin-contact-whites follow the red wine-making method; white grape skins, which would usually be pressed off and discarded, are left to steep with the grape juice (like tea) for some time. It's a broad category, but what emerges isn't your typical white wine, at least by today's standards. Its hues range from deep yellow to opaque amber. Because of this time in contact with the skins, the wines emerge with grippy texture, unique aromatic profiles, and red-wine-like characters.
