

**K A S K**

**BOTTLE LIST**

**APRIL 2026**

## **VEGAN, ORGANIC, NATURAL, LOW INTERVENTION, BIODYNAMIC**

All our wines are vegan + organic, although not necessarily certified. Many of the wines can be classified as 'natural' and/or 'low intervention' but as these terms can mean different things to different people, we haven't listed them as such. A number of our wines are made biodynamically.

This may mean nothing to you: all you need to know is that each wine on the list tastes fantastic, is farmed organically + sustainably, and with as few chemicals as possible.

## **AVAILABILITY**

The list evolves constantly: we try to keep on top of it but with many of our wines being produced in small batches, we may be sold out of your first choice, or we may have forgotten to get one in the fridge. But we'll suggest something else we think you'll like.

## **A QUICK WORD ON VINTAGE**

Vintage variation (i.e. the same wine but from a different year) is really important with some tasting drastically different year on year, however you may notice some of the wines in this list are not dated with the year of their production. This is because, at the time of writing, many of our importers are switching vintages and we'd have to write the whole list again in a few months. So instead, we'll update the vintage of each wine the next time we get a new delivery of them.

<b>FIZZ</b>	<b>3</b>
