What's **M**atcha?

Matcha is a type of Japanese green tea.

A premium Japanese green tea milled into a fine powder. Traditionally and culturally appreciated in tea ceremonies across Japan. A vibrant green, creamy, aromatic, smooth and subtly sweet tea.

Our **M**atcha

Our matcha is crafted from the highest-grade tea leaves sourced exclusively from **UJI, KYOTO** — Japan's most prestigious matcha region.

Carefully stone-ground to preserve its vibrant colour, rich umami, and naturally smooth sweetness, it offers a refined depth of flavour with no bitterness.

Crafted with the highest-grade first-flush MATCHA, HOJI-CHA powder, each serving is meticulously whisked by hand using a traditional bamboo tea whisk.

What's **H**oji-cha?

HOJI-CHA is roasted green tea, this is traditionally an after dinner tea. It uses the last autumn season's leaves and stems and is high roasted at 180c to form a golden caramel like nutty aromatic tea. It is almost decaf.

A lot of Benefits of **H**oji-cha?

Keeps skin healthy and clear

The Vitamin C in Hoji-cha is responsible for helping keep skin healthy and clear. Vitamin C helps lighten dark areas of the skin caused from age spots and acne scars. Vitamin C also prevents wrinkles, and restores skin elasticity by stimulating collagen production.

Boosts weight loss

Hoji-cha boosts weight loss, as its catechins help decrease body weight and body fat percentage. As a green tea, Houji-cha promotes fat oxidation by increasing energy expenditure. Finally, Hoji-cha antioxidants help increase the body's metabolism.
